The Federal University of Santa Catarina was founded in 1962 and since then has consolidated its status as one of the most important universities in Brazil. This recognition is due to its quality regarding teaching, research and extension activities carried out in its five campi, including those activities developed in the graduate programs.

The graduate programs at UFSC award 3 different degrees: academic master’s degree; academic doctoral degree and professional master’s degree. While the academic master’s and doctoral programs are concerned with the educational improvement of teachers and researchers, and focus on strategic activities related to teaching, research and extension, the professional master’s program, on the other hand, contributes to enhance professional credentials with the study of techniques, processes or themes in compliance with specific market demands. Both MA programs last 24 months, and the doctoral program lasts 48 months. At UFSC there are 55 doctoral programs and 75 master programs, amongst which 61 are academic and 14 are professional.

All master’s and doctoral programs are evaluated by CAPES, the Brazilian agency at the Ministry of Education devoted to the improvement of Higher Education Personnel and research, which exerts a fundamental role in the expansion and consolidation of graduate education in Brazil. In the latest 3-year evaluation by CAPES, 17 of UFSC’s programs were considered excellent according to international standards, and more than 60% of the programs ranked high or very high (from 5 to 7, which is the highest rank). In 2014, 3 other programs were founded, contributing to consolidate the other campi in the state of Santa Catarina, especially in the towns of Joinville and Araranguá.

The academic master’s and doctoral programs receive funding for the development of activities and scholarships for students from CAPES, CNPq (National Council for the Scientific and Technological Council) and FAPESC (Foundation for research and innovation in the State of Santa Catarina). Doctoral students may obtain a scholarship to carry out study and research in foreign universities. At present UFSC holds international agreements with 400 universities in more than 50 countries. This type of cooperation contributes to improve the quality of the work at UFSC, to elevate standards and to acknowledge the recognition of the high-quality 77 graduate programs in Brazil and abroad.
